# PELLET STATIC ELIMINATOR

Eliminator MSE For resin pellets only

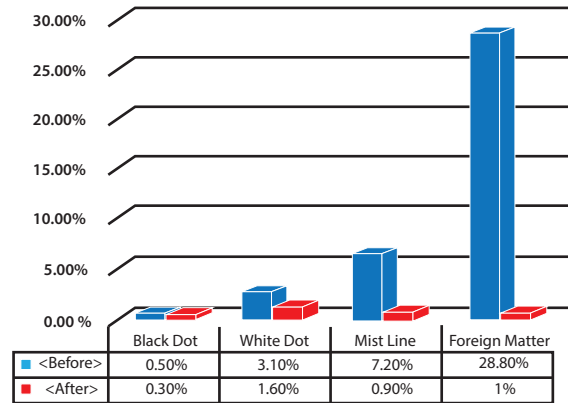

## A POWERFUL STATIC ELIMINATOR DEDICATED TO RESIN PELLETS

Stabilization of molding conditions to prevent re-absorption

## SUMMARY

Proven technology from a long experienced manufacturer with high performance. Available to adjust the electric potential to positive or negative. Prevent powdering and floss cross sections are minimized. Long life span of approximately 8 years.

## FEATURES

- Stabilization of molding conditions
- Prevent Re-absorption
- Accelerate recycling material's flow
- Prevent white spots and black spots
- Prevent color unevenness
- Prevent recycled material separation
- No material accumulation
- Reduce the metal detector's malfunction
- Less maintenance, Less powder.
- Ensure the glass-tube visibly.
